

Teslim ABDULWAHAB

+234-8067988642 | tesimune@gmail.com | <https://tesimune.vercel.app>

Professional Profile

Result-oriented Software Engineer specialized in MERN Stack and LAMP Stack development, with over 7 years of coding experience and 5 years of professional experience. Proficient in all stages of the development cycle for dynamic projects. Skilled in programming languages and frameworks, including Python (Django, Flask), PHP (Laravel), and JavaScript/TypeScript (React.JS, Next.JS, Vue.JS, NodeJS, Express, NestJS).

Technical Proficiency

Frontend Development:

- JavaScript/TypeScript (Frameworks: React.JS, Next.JS, Vue.JS)
- CSS (Frameworks: Tailwind CSS & Libraries: DaisyUI, Shadcn)

Backend Development:

- JavaScript/TypeScript (Runtime: NodeJS, Express, NestJs)
- Python (Frameworks: Django, Flask)
- Java (Frameworks: Spring Boot)
- PHP (Frameworks: Laravel)

Database Management:

- SQL Databases: MySQL, PostgreSQL
- NoSQL Databases: MongoDB, Firebase

DevOps and Cloud Services:

- Cloud Providers: AWS, Azure, Google console, Firebase
- Version Control: Git, GitHub
- Containerization: Docker

Skills and Competencies

- Microsoft Office Proficiency
- Excellent Oral and Written Communication
- Team Work
- Project management
- Strong decision maker
- Innovation
- problem solving

Stack Experience

- Front-End Web Developer Since 2015
- Backend-End Web Developer Since 2018
- Full-Stack Web Developer Since 2020
- Software Engineering Since 2022

Education

Kaduna State University

BSc. Chemistry

2018-2023.

Miva Open University

BSc. Cybersecurity

2025-2027.

Work Experience

ANALOGUESHIFTS (REMOTE)

2022 – Present

Full Stack Developer - Senior Software Engineer

- Engineered and optimized cross-platform mobile and web applications, ensuring seamless user experiences across diverse devices and platforms, resulting in an increase in user satisfaction and adoption rates.
- Architected and implemented robust frontend and backend service architectures, streamlining performance and scalability, leading to an improvement in application efficiency and responsiveness.
- Collaborated closely with interdisciplinary teams to diagnose and resolve intricate code issues, fostering a collaborative and solution-oriented work environment, resulting in decrease in bug frequency and application downtime.
- Conducted comprehensive code reviews and provided actionable feedback to elevate code quality and maintainability standards, contributing to an increase in application stability and reliability.
- Stayed abreast of emerging technologies and industry trends, driving innovation and continuous improvement initiatives within the development lifecycle, resulting in a enhancement in development process efficiency and effectiveness.
- Implemented stringent security protocols to fortify user data protection and ensure regulatory compliance, achieving an enhancement in application security posture and user trust.
- Played a pivotal role in optimizing application performance and scalability through the implementation of efficient coding practices and architectural enhancements, resulting in an

improvement in application speed and scalability metrics.

- Led comprehensive code reviews and implemented best practices, enhancing code quality and maintainability, resulting in decrease in bug incidents post-release.
- Championed the adoption of emerging technologies and industry trends, driving continuous improvement and innovation within the development process, resulting in a increase in productivity and efficiency.
- Implemented robust security measures to safeguard user data and ensure compliance with industry standards, achieving an reduction in security vulnerabilities.
- Acted as a mentor and subject matter expert, providing guidance and support to junior developers, resulting in improvement in team performance and collaboration.
- Collaborated with cross-functional teams to define project requirements and deliverables, ensuring alignment with business objectives and client expectations, resulting in on-time delivery rate.

VROOM NG (REMOTE)

2023 – 2024

Back-End Developer: *Stack NodeJS and Laravel (PHP)*

- Led the backend development efforts utilizing Node.js, and Laravel (PHP), ensuring efficient and scalable solutions for API applications, showcasing competency and achievement.
- Collaborated with front-end and mobile developers to integrate API logic with user-facing elements, ensuring seamless functionality and optimal user experiences, reflecting proficiency and achievement.
- Implemented RESTful APIs to facilitate communication between frontend/mobile and backend systems, contributing to an increase in application performance and responsiveness.
- Conducted comprehensive testing and debugging to identify and address backend issues, resulting in a decrease in post-release bug incidents.
- Stayed updated with the latest developments in backend technologies and frameworks, driving continuous improvement and innovation within the development process, showcasing expertise and accomplishment.
- Provided documentations, technical guidance and support to team members, fostering a collaborative and productive work environment, contributing to improvement in team performance and collaboration.

HOSTSHIFTS (REMOTE)

2024 – 2024

Senior Software Engineer

- Implemented automated deployment processes and continuous integration pipelines, resulting in reduction in deployment time and improved release frequency.
- Conducted regular performance audits and optimizations on hosting servers, achieving increase in server efficiency and cost savings.
- Developed custom monitoring and alerting solutions to proactively identify and address potential issues, ensuring maximum uptime and reliability for clients' websites.
- Acted as a technical lead for the hosting team, providing mentorship and guidance to junior engineers, resulting in improvement in team performance and collaboration.

- Collaborated with the sales and marketing teams to create technical documentation and sales materials, contributing to increase in client acquisition and retention.

FASTBUKA (REMOTE)

2024 – 2024

Senior Software Engineer

- Implemented automated deployment processes and continuous integration pipelines, resulting in reduction in deployment time and improved release frequency.
- Conducted regular performance audits and optimizations on hosting servers, achieving increase in server efficiency and cost savings.
- Developed custom monitoring and alerting solutions to proactively identify and address potential issues, ensuring maximum uptime and reliability for clients' websites.
- Acted as a technical lead for the hosting team, providing mentorship and guidance to junior engineers, resulting in improvement in team performance and collaboration.
- Collaborated with the sales and marketing teams to create technical documentation and sales materials, contributing to increase in client acquisition and retention.
